

PRESSEMITTEILUNG

Shell eröffnet die schnellste Ladesäule Österreichs

St.Pölten, 02.11.2022 – Shell eröffnet Österreichs derzeit schnellste Ladesäule in St.Pölten. Mit einer Leistung von bis zu 360 kW kann die neue Ladestation ein Elektroauto in 15 Minuten oder weniger vollständig aufladen.

Die Ladesäule befindet sich an der Mariazeller Straße vor der Auffahrt zur Westautobahn und bietet für Pendler*innen nach Wien die Möglichkeit, ihr E-Auto auf dem Weg zur Arbeit rasch zu laden. Die Terra 360 von ABB ist aktuell die weltweit leistungsstärkste All-in-One-Ladelösung und ist dafür ausgelegt mehrere E-Fahrzeuge gleichzeitig zu bedienen.

Saghi Froughivand, Leiterin des Tankstellengeschäfts in Österreich sagte: *„Wir wollen in Österreich führender Anbieter von Ladeinfrastruktur werden. Gleichzeitig wollen wir unseren Kunden die Möglichkeit bieten, Strom dort zu laden wo sie es gerade brauchen, um so den Umstieg auf ein batterieelektrisches Fahrzeug zu erleichtern. Ob eine Lademöglichkeit Zuhause, während des Einkaufens oder an einer Ultraschnellladesäule an der Tankstelle, wir wollen für alle die beste Lösung bieten“.*

„Der Verkehrssektor ist für rund 29 Prozent der weltweiten Treibhausgasemissionen verantwortlich. Deshalb war es noch nie so wichtig wie heute, den Wandel gemeinsam voranzutreiben. Wir freuen uns daher sehr, gemeinsam mit Shell Schnellladesäulen in Österreich zu errichten.“, ergänzt Frank Mühlon, CEO von ABB E-mobility.

Shell ist der weltweit größte Mobilitätsanbieter mit über 46'000 Stationen in 80 Märkten rund um den Globus. Das Unternehmen beabsichtigt, bis 2025 weltweit mehr als 500'000 und bis 2030 über 2.500.000 Ladepunkte zu errichten. Kürzlich hat Shell die auch in Wien tätige SBRS GmbH übernommen, den führenden Anbieter von Ladeinfrastrukturlösungen für E-Busse und E-LKWs. Shell Recharge Solutions arbeitet in Österreich daran, die passenden Ladelösungen für Unternehmen anzubieten. Seit kurzem kooperiert Shell mit Rewe in Österreich, um Shell Recharge Schnellladesäulen an Supermärkten in Österreich zu errichten.

Hinweise für Redaktionen

- Die angegebene Ladegeschwindigkeit ist für zukünftige Elektrofahrzeuge ausgelegt. Üblicherweise hängen Ladegeschwindigkeit und Energiebedarf pro Kilometer vom Fahrzeug ab. Auch die Umgebungstemperatur und der Ladezustand der Batterie zum Zeitpunkt des Ladevorgangs können sich auf die tatsächliche Ladegeschwindigkeit und den Energiebedarf pro Kilometer auswirken.

Cautionary note

The companies in which Shell plc directly and indirectly owns investments are separate legal entities. In this **press release** "Shell", "Shell Group" and "Group" are sometimes used for convenience where references are made to Shell plc and its subsidiaries in general. Likewise, the words "we", "us" and "our" are also used to refer to Shell plc and its subsidiaries in general or to those who work for them. These terms are also used where no useful purpose is served by identifying the particular entity or entities. "Subsidiaries", "Shell subsidiaries" and "Shell companies" as used in this **press release** refer to entities over which Shell plc either directly or indirectly has control. Entities and unincorporated arrangements over which Shell has joint control are generally referred to as "joint ventures" and "joint operations", respectively. "Joint ventures" and "joint operations" are collectively referred to as "joint arrangements". Entities over which Shell has significant influence but neither control nor joint control are referred to as "associates". The term "Shell interest" is used for convenience to indicate the direct and/or indirect ownership interest held by Shell in an entity or unincorporated joint arrangement, after exclusion of all third-party interest.

Forward-Looking Statements

This **press release** contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) concerning the financial condition, results of operations and businesses of Shell. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management's current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in these statements. Forward-looking statements include, among other things, statements concerning the potential exposure of Shell to market risks and statements expressing management's expectations, beliefs, estimates, forecasts, projections and assumptions. These forward-looking statements are identified by their use of terms and phrases such as "aim", "ambition", "anticipate", "believe", "could", "estimate", "expect", "goals", "intend", "may", "milestones", "objectives", "outlook", "plan", "probably", "project", "risks", "schedule", "seek", "should", "target", "will" and similar terms and phrases. There are a number of factors that could affect the future operations of Shell and could cause those results to differ materially from those expressed in the forward-looking statements included in this **press release**, including (without limitation): (a) price fluctuations in crude oil and natural gas; (b) changes in demand for Shell's products; (c) currency fluctuations; (d) drilling and production results; (e) reserves estimates; (f) loss of market share and industry competition; (g) environmental and physical risks; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) the risk of doing business in developing countries and countries subject to international sanctions; (j) legislative, judicial, fiscal and regulatory developments including regulatory measures addressing climate change; (k) economic and financial market conditions in various countries and regions; (l) political risks, including the risks of expropriation and renegotiation of the terms of contracts with governmental entities, delays or advancements in the approval of projects and delays in the reimbursement for shared costs; (m) risks associated with the impact of pandemics, such as the COVID-19 (coronavirus) outbreak; and (n) changes in trading conditions. No assurance is provided that future dividend payments will match or exceed previous dividend payments. All forward-looking statements contained in this **press release** are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Readers should not place undue reliance on forward-looking statements. Additional risk

factors that may affect future results are contained in Shell plc's Form 20-F for the year ended December 31, 2021 (available at www.shell.com/investor and www.sec.gov). These risk factors also expressly qualify all forward-looking statements contained in this **press release** and should be considered by the reader. Each forward-looking statement speaks only as of the date of this **press release**, [02.11.2022]. Neither Shell plc nor any of its subsidiaries undertake any obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information. In light of these risks, results could differ materially from those stated, implied or inferred from the forward-looking statements contained in this **press release**.

Shell's net carbon footprint

Also, in this **press release** we may refer to Shell's "Net Carbon Footprint" or "Net Carbon Intensity", which include Shell's carbon emissions from the production of our energy products, our suppliers' carbon emissions in supplying energy for that production and our customers' carbon emissions associated with their use of the energy products we sell. Shell only controls its own emissions. The use of the term Shell's "Net Carbon Footprint" or "Net Carbon Intensity" are for convenience only and not intended to suggest these emissions are those of Shell plc or its subsidiaries.

Shell's net-Zero Emissions Target

Shell's operating plan, outlook and budgets are forecasted for a ten-year period and are updated every year. They reflect the current economic environment and what we can reasonably expect to see over the next ten years. Accordingly, they reflect our Scope 1, Scope 2 and Net Carbon Footprint (NCF) targets over the next ten years. However, Shell's operating plans cannot reflect our 2050 net-zero emissions target and 2035 NCF target, as these targets are currently outside our planning period. In the future, as society moves towards net-zero emissions, we expect Shell's operating plans to reflect this movement. However, if society is not net zero in 2050, as of today, there would be significant risk that Shell may not meet this target.

Forward Looking Non-GAAP measures

This **press release** may contain certain forward-looking non-GAAP measures such as **cash capital expenditure** and **divestments**. We are unable to provide a reconciliation of these forward-looking Non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile those Non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of Shell, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are calculated in a manner which is consistent with the accounting policies applied in Shell plc's consolidated financial statements.

The contents of websites referred to in this **press release** do not form part of this **press release**.

We may have used certain terms, such as resources, in this **press release** that the United States Securities and Exchange Commission (SEC) strictly prohibits us from including in our filings with the SEC. Investors are urged to consider closely the disclosure in our Form 20-F, File No 1-32575, available on the SEC website www.sec.gov.
