Schnell beim Einkaufen Strom laden mit Shell und der REWE Group

Shell Austria und die REWE Group eröffnen die ersten Shell Recharge Schnellladesäulen bei ausgewählten BILLA Filialen in Österreich. Ab sofort haben Kund*innen die Möglichkeit, während des Einkaufs ihr E-Auto mit Ökostrom aufzuladen. Shell und die REWE Group wollen bis 2025 Shell Recharge Schnellladesäulen mit 150 kW Ladeleistung an 100 BILLA, BIPA und PENNY Standorten in Österreich errichten.

„Wir wollen unseren Kunden die Möglichkeit bieten, Strom dort zu laden, wo sie es gerade brauchen, um so den Umstieg auf ein batterieelektrisches Fahrzeug zu erleichtern. Ob eine Lademöglichkeit Zuhause, während des Einkaufs oder an einer Ultraschnellladesäule an der Tankstelle, wir wollen für alle die beste Lösung bieten.“, sagt Saghi Naglis, Mobility Managerin von Shell in Österreich.

Die neuen Schnellladesäulen sind mit den meisten Elektrofahrzeugen kompatibel und bieten eine leistungsstarke Ladekapazität, die es ermöglicht, die Fahrzeuge in der Zeit eines durchschnittlichen Einkaufs wesentlich aufzuladen. Die Ladesäulen befinden sich derzeit bei BILLA Filialen in Maria Lanzendorf, Gmünd, Raasdorf, Eichgraben, Jennersdorf, Wr. Neustadt, Gratkorn, Knittelfeld, Pernitz, Prinzersdorf, Schwanenstadt und Pöggstall.

BILLA Vorstand Robert Nagele: „Wir möchten für unsere Kund:innen die E-Ladeinfrastruktur kontinuierlich erweitern. Umso mehr freut es mich, dass wir mit Shell den Ausbau mit Schnellladesäulen im BILLA-Filialnetz weiter forcieren und innerhalb der nächsten zwei Jahre weitere 100 Standorte von BILLA, BIPA und PENNY damit ausstatten. Mit der Erweiterung unseres E-Ladernetzes leisten wir einen Beitrag zum Klimaschutz und bieten die Infrastruktur für die Mobilität der Zukunft.“

Shell will bis 2050 ein Unternehmen mit Netto-Null-Emissionen werden. Ein Baustein hierfür ist der Aufbau eines breiten Ladeangebotes für Elektrofahrzeuge. Dafür wurden auch auf dem deutschsprachigen Markt schon früh die Weichen gestellt. 2017 hat das Unternehmen NewMotion, den damals größten europäischen Ladeanbieter Europas gekauft, der mittlerweile in Shell Recharge Solutions unbenannt wurde. 2019 hat Shell begonnen, Shell Recharge Schnellladesäulen auf Shell Tankstellen zu bauen. 2021 hat Shell das Berliner Startup ubitricity gekauft, die das Laden an Laternen ermöglichen. Vor kurzem hat Shell die SBRS GmbH

übernommen, einen führenden Anbieter von Ladeinfrastrukturlösungen für kommerzielle Elektrofahrzeuge. Shell und BYD unterzeichneten auf globaler Ebene 2022 eine strategische Kooperationsvereinbarung, um gemeinsam die E-Mobilität voranzutreiben und das Ladeerlebnis für BYD Kund*innen zu verbessern. Im Jahr 2022 hat Shell die ersten Shell Recharge Schnellladesäulen auf Parkplätzen von REWE und PENNY Märkten in Deutschland eröffnet. Zudem besteht ein Kooperationsvertrag mit IONITY, dem Joint Venture aus Audi, BMW, Daimler, Ford, Hyundai, Porsche und Volkswagen, Schnellladesäulen entlang von Autobahnen in europäischen Ländern zu errichten. In Österreich plant Shell bis 2025 ein flächendeckendes Ladenetz an Autobahnen zu errichten. Bis 2025 hat Shell das Ziel, über 70.000 und bis 2030 über 200.000 öffentliche Ladepunkte weltweit zu betreiben.

Cautionary Note

The companies in which Shell plc directly and indirectly owns investments are separate legal entities. In this press release "Shell", "Shell Group" and "Group" are sometimes used for convenience where references are made to Shell plc and its subsidiaries in general. Likewise, the words "we", "us" and "our" are also used to refer to Shell plc and its subsidiaries in general or to those who work for them. These terms are also used where no useful purpose is served by identifying the particular entity or entities. "Subsidiaries", "Shell subsidiaries" and "Shell companies" as used in this press release refer to entities over which Shell plc either directly or indirectly has control. Entities and unincorporated arrangements over which Shell has joint control are generally referred to as "joint ventures" and "joint operations", respectively. "Joint ventures" and "joint operations" are collectively referred to as "joint arrangements". Entities over which Shell has significant influence but neither control nor joint control are referred to as "associates". The term "Shell interest" is used for convenience to indicate the direct and/or indirect ownership interest held by Shell in an entity or unincorporated joint arrangement, after exclusion of all third-party interest.

Forward-Looking Statements

This press release contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) concerning the financial condition, results of operations and businesses of Shell. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management's current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in these statements. Forward-looking statements include, among other things, statements concerning the potential exposure of Shell to market risks and statements expressing management's expectations, beliefs, estimates, forecasts, projections and assumptions. These forward-looking statements are identified by their use of terms and phrases such as "aim", "ambition", "anticipate", "believe", "could", "estimate", "expect", "goals", "intend", "may", "milestones", "objectives", "outlook", "plan", "probably", "project", "risks", "schedule", "seek", "should", "target", "will" and similar terms and phrases. There are a number of factors that could affect the future operations of Shell and could cause those results to differ materially from those expressed in the forward-looking statements included in this press release, including (without limitation): (a) price fluctuations in crude oil and natural gas; (b) changes in demand for Shell's products; (c) currency fluctuations; (d) drilling and production results; (e) reserves estimates; (f) loss of market share and industry competition; (g) environmental and physical risks; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) the risk of doing business in developing countries and countries subject to international sanctions; (j) legislative, judicial, fiscal and regulatory developments including regulatory measures addressing climate change; (k) economic and financial market conditions in various countries and regions; (l) political risks, including the risks of expropriation and renegotiation of the terms of contracts with

governmental entities, delays or advancements in the approval of projects and delays in the reimbursement for shared costs; (m) risks associated with the impact of pandemics, such as the COVID-19 (coronavirus) outbreak; and (n) changes in trading conditions. No assurance is provided that future dividend payments will match or exceed previous dividend payments. All forward-looking statements contained in this press release are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Readers should not place undue reliance on forward-looking statements. Additional risk factors that may affect future results are contained in Shell plc's Form 20F for the year ended December 31, 2023 (available at www.shell.com/investor and www.sec.gov). These risk factors also expressly qualify all forward-looking statements contained in this press release and should be considered by the reader. Each forward-looking statement speaks only as of the date of this press release, November, 9. Neither Shell plc nor any of its subsidiaries undertake any obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information. In light of these risks, results could differ materially from those stated, implied or inferred from the forward-looking statements contained in this press release.

Shell's net carbon intensity

Also, in this press release we may refer to Shell's "Net Carbon Intensity", which include Shell's carbon emissions from the production of our energy products, our suppliers' carbon emissions in supplying energy for that production and our customers' carbon emissions associated with their use of the energy products we sell. Shell only controls its own emissions. The use of the term Shell's "Net Carbon Intensity" is for convenience only and not intended to suggest these emissions are those of Shell plc or its subsidiaries.

Shell's net-zero Emissions Target

Shell's operating plan, outlook and budgets are forecasted for a ten-year period and are updated every year. They reflect the current economic environment and what we can reasonably expect to see over the next ten years. Accordingly, they reflect our Scope 1, Scope 2 and Net Carbon Intensity (NCI) targets over the next ten years. However, Shell's operating plans cannot reflect our 2050 net-zero emissions target and 2035 NCI target, as these targets are currently outside our planning period. In the future, as society moves towards net-zero emissions, we expect Shell's operating plans to reflect this movement. However, if society is not net zero in 2050, as of today, there would be significant risk that Shell may not meet this target.

Forward Looking Non-GAAP measures

This press release may contain certain forward-looking non-GAAP measures. We are unable to provide a reconciliation of these forward-looking Non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile those Non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of Shell, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are calculated in a manner which is consistent with the accounting policies applied in Shell plc's consolidated financial statements.
